

Keynote speaker
Professor John P. Reganold
speech on 19th of June 2017 at 15.30-16.30

Dr. John P. Reganold has shaped his career by his interest in agriculture and the environment, receiving his M.S. in Soil Science from UC Berkeley and his Ph.D. in Soil Science from UC Davis. He joined Washington State University in 1983 and is currently Regents Professor of Soil Science and Agroecology.

He has spent 30-plus years bringing a blend of innovative research and teaching on sustainable farming systems into the mainstream of higher education and food production. His research has measured the effects of organic, integrated, and conventional farming systems on productivity, financial performance, and environmental quality on four continents.

He has 185 publications in scientific journals, magazines, and proceedings, including *Science*, *Nature*, and *Scientific American*. He has taught more than 3,500 undergraduate students in soil science courses. His former graduate students are on the front lines of sustainability around the world, bringing food security to sub-Saharan Africa, adapting quinoa to salty soils, and turning wastes into resources in Haiti.
